

PacLease created PacTrainer™ exclusively for rental and leasing customers by partnering with J.J. Keller.

JJ Keller has over 60 years of experience making safety and compliance easier for fleets.

- Simplify the training process with accessible and interactive courses on an online platform available for employees across the country 24/7.
- Provide access to quality, relevant and current training content that includes helpful quizzes along the way with a final test that will strengthen the learning process.
- Train employees in group or individually and monitor training progress.
- Make drivers more aware of safety and regulatory compliance. Help them to better understand violations and the importance of their safety scores. Drivers can use this training in real-life working conditions.

To be competitive and respond to business opportunities you need to train your employees. With PacTrainer your employees can better handle their job and be more prepared on the road.

Contact us to get specific information about the annual PacTrainer license access and discover what option works better for your company: Video subscription or Interactive Training.
